

"BEE"WARE OF THE BEES!

Well, it is officially summer once again and with that comes the usual Southern California issues. If you have been watching the local news lately, you probably have noticed several stories about wasp and bee swarms. These attacks have Southern Californians on high alert. Killer bees are here and they are not going away anytime soon. The bees are apparently multiplying at a very fast rate and experts say people need to be aware of what's on their property before it gets out of hand.

You may find the attached pamphlet helpful should you encounter this problem at any of your properties.
